Maybe technology will help me get across  
I'll learn the language connections  
I'll find the keys

~~I'll~~ forget the instruction  
Talk into the void.  
Connect with reality

The chance and random life of matter  
~~Quantum mechanics is based on experiments conducted in the subatomic realm. No one has ever seen an atom much less subatomic particles such as electrons + neutrons. Nor has anyone ever tasted touched or smelled an atom~~

Particle-like + wave-like behavior are the only properties that we ascribe to light and these are known to exist only by our interaction with light - then it appears light has no properties independent of us. To say that something has no properties is the same as saying it does not exist. - Without us light does not exist

Without us or anything to interact with light does not exist - but this is only half the story. The other half is that, without light or by implication anything else to interact with, we do not exist  
the observed + the observer

~~If I don't get across I <sup>do</sup> not exist~~  
~~We are here and out there~~

~~What I experience is not reality, but my interaction with it~~  
~~The light comes from interaction~~
