Workshop for Librarians - 9:00am-2:00pm

Working group of librarians and managers synthesize ideas from the program toward a resulting White Paper that presents a framework for developing collections, metadata, taxonomy, database and website, and other resources for support of materials education and research in art and design libraries, as well as recommendations for collaboration.

This event is made possible through a National Leadership Grant from the Institute of Museum and Library Services. IMLS is the primary source of federal support for the nation's 123,000 libraries and 17,500 museums. Through grant making, policy development, and research, IMLS helps communities and individuals thrive through broad public access to knowledge, cultural heritage, and lifelong learning.

Additional support provided by Rhode Island School of Design.
