

**3,190,000 Barrels**  
*The Deepwater Horizon Oil Spill*

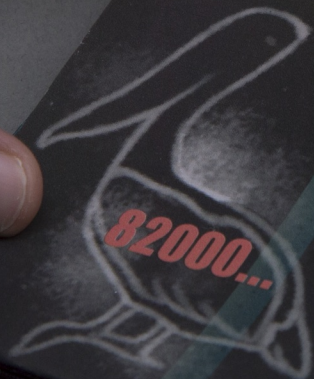

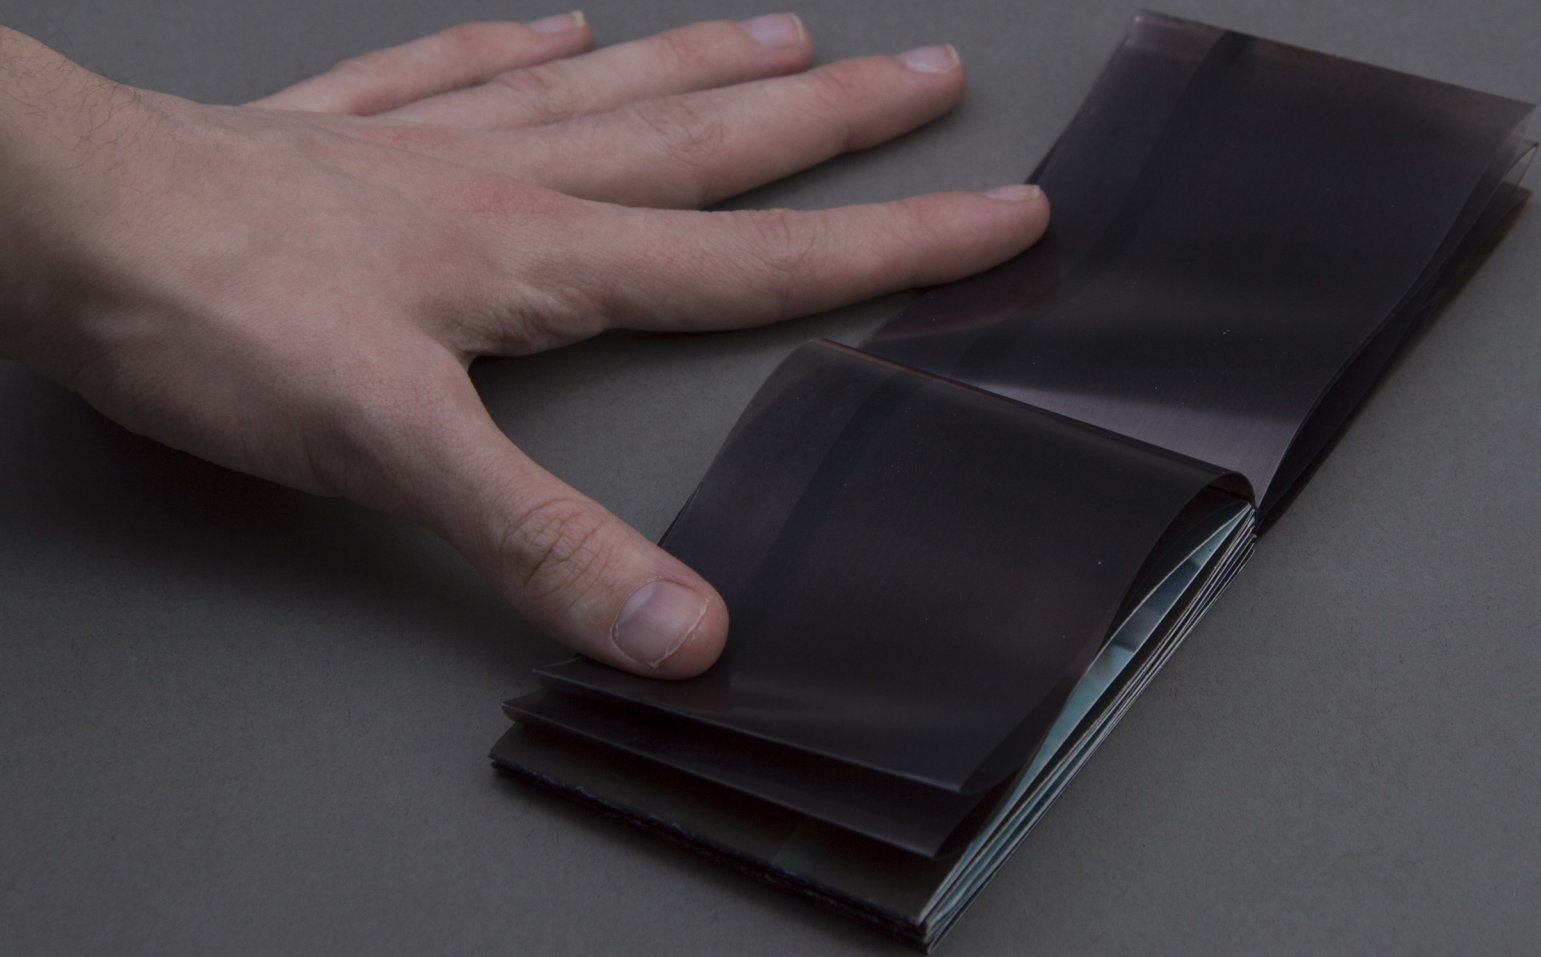

"Everyone involved  
with the job  
was **completely satisfied....**"

**82000...**

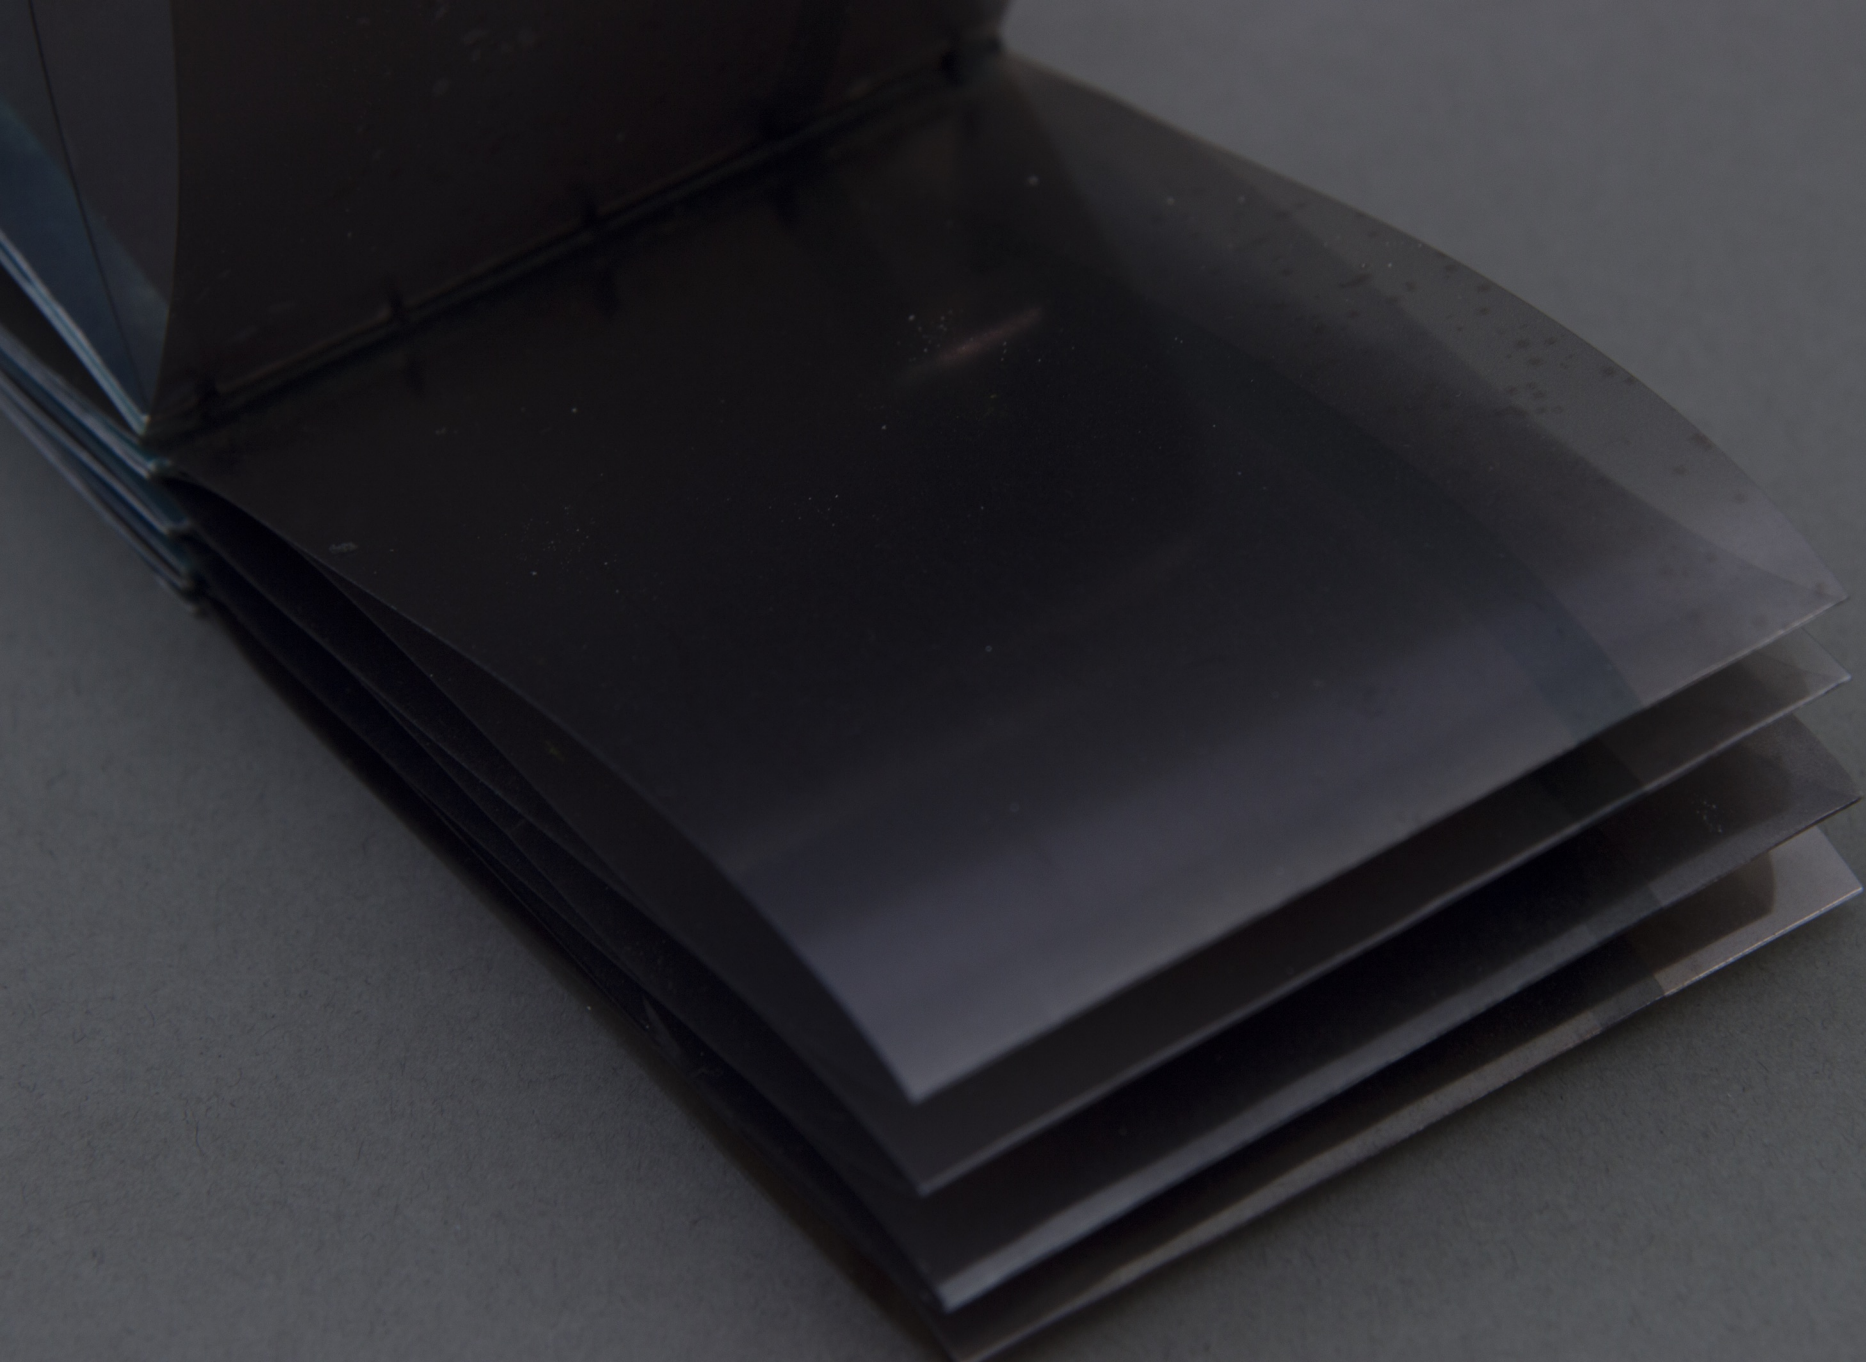

82000...

The **BP Deepwater Horizon Oil Spill** was the **largest** marine oil spill in history. The spill occurred on April 20, 2010 off of the coast of the Gulf of Mexico and spread across more than **256 miles** of ocean. Only **25%** of the **3.19 million barrels** of oil were ever recovered. The ecosystem was **completely devastated** by the initial explosion, leaked oil, and chemical dispersants. Nine years later, the animals in the area are still **recovering**.
