Voting Act

We created this book with the intent of shedding light
on the history of voting rights within the United
States. Our goal was to share voices not often heard
within the mainstream and to build a more nuanced
conversation than was offered during the polarizing
2016 election year. With the election results of
Donald Trump winning the Electoral College but losing
the popular vote, we must now confront with the fact
that our country is greatly divided. Our hope is that this
book will bring light to this division and acknowledge
that we must come together. We must create space for
open engagement and conversation with each other.
We must use this as inspiration to work harder and make
our voices heard. Every voice matters and this
conversation is not over.

"Divisive and divisive" was created by six students as the final project of the Typography & Book Arts course at Seton College. The theme of our class was types of gender and gender techniques included layered printing and folded book structures. Under the supervision of Professor Chalmers, the book was printed on Rives Lightweight paper and the book's contents include Entwistle and Edward's, Gill Sans Small Caps, Fournier, Univers and wood type. Imagery was produced with linocuts, and the physical copy of the book. Quotes found in our book were gathered from a survey of survey responses accompanying the physical copy of the book. Quotes found in our book were gathered from a survey of survey responses accompanying the physical copy of the book. Quotes found in our book were gathered from a survey of survey responses accompanying the physical copy of the book.

This book is set of 100 copies.

Divisive and Diverse was created by six students as the final project of the Typography & Book Arts course at Scripps College. The theme of our class was layers of gender and semester techniques included layered printing and folded book structures. Under the supervision of Professor Blassingame, the book was printed on Rives Lightweight paper and the book's container was printed on Langdel hand made paper. It was letterpress printed using handset metal and wood type. The metal typefaces include Erhardt and Erhardt Italic, Gill Sans Small Caps, Fournier, Univers and wood type. Imagery was produced with linocuts, and the Spotify playlist was created to accentuate and accompany the physical copy of the book. Quotes found in our book were gathered from a survey we made about identity and the political climate. The majority of survey responses came from members of the Claremont University Consortium, the general public and our family and friends.

This book is 69 of 80 copies.
